

# Different Kinds of Applications / Websites

Only HTML + JS + CSS

A **static host** (doesn't execute server-side code) suffices!

Server needs to host + provide HTML, JS and CSS assets

Example services: AWS S3, Firebase Hosting,...

Server-side Code (Node.js)

Need **dynamic host** (able to execute server-side Node.js)

Server needs to host + execute files (server-side)

Example services: AWS Elastic Beanstalk, Heroku, ...
