# Deleting Object(s)

Hibernate CRUD Apps

- **C**reate objects

- **R**ead objects

- **U**pdate objects

- **D**elete objects

Delete a Student

```java
int studentId = 1;

Student myStudent = session.get(Student.class, studentId);

// delete the student
session.delete(myStudent);

// commit the transaction
session.getTransaction().commit();
```

Another way of deleting

```
session
    .createQuery("delete from Student where id=2")
    .executeUpdate();
```
