How To Take This Course and How To Get Help

How To Take This Course

As you go through the course, I highly recommend that you type code along with me in the videos. This is the best way to learn the material.

Some students will watch the video first and then replay it while typing in the code. Others like to type along on the first watch. Choose whatever approach works for you.

But the important thing is that you type in the code. This is the most effective way to really learn the material.

How To Get Help

If you have any coding questions or have a syntax error, here's how you can get help:

1. Download the source code.

I have all of the solution source code available in the zip file.

You can download the zip file from **Section 1, Lecture 3**.

Compare your code against the solution code.

2. Post a Message

If you are not able to resolve the problem, post a message to the discussion forum. Be sure to paste your Java/JSP source code along with any relevant config files.

I'm a very responsive instructor and I'll respond to your question in 24 hours.

Enjoy the class :-)
